

# Saucon's Touch Now Talks!

## Another first from Saucon. 'Touch to Talk'

- a new voice solution that provides a safe and secure **two way** hands-free method of communication that bridges the gap between dispatch and drivers, activated by a simple touch of a button.

- One button touch to talk between Dispatch and drivers
- Integrates directly with the Saucon portal
- Audible and visual notifications generated in the portal
- Includes historical Audio Log Report
- Functionality is remotely installed
- Utilizes current hardware - no added expense
- Reduce existing two-way communication costs
- Safe, easy to use, and cost effective
